One of the most versatile stones to ever be unearthed, slate has been an essential building material for centuries. Featuring a range of colors and low water absorption, civilizations worldwide embraced slate not only as an incredibly durable roofing and flooring material, but also as a versatile component of everything from chalkboards to pool tables.

Today, the look of slate has been reimagined by the award-winning design team at Mediterranea, in a porcelain tile series that upholds slate's tradition of durability and resilience. The all-new MODERN SLATE series is designed as a new twist on a classic stone; just what designers need to put the finishing touch on both interior and exterior surfaces.

Modern Slate is available in both 12" x 24" and the extra-large 24" x 48" size – a format ideal for maximizing design potential, while minimizing grout joints. As a rectified tile, Modern Slate can be installed with joints as small as 1/8" throughout the project. Five designer colors are available with the series: Ivory, Charcoal, Grey, Taupe and Noce (Chocolate). This brilliant range gives designers a range of options when contemplating color layouts and possibilities. Matching bullnose and mosaic trim round out the collection.

For maximum versatility, Modern Slate is also available in two finishes. The matte finish is ideal for interior installations, while a special Anti-Slip finish is available in the 12" x 24" format, making it perfect for exterior floors, and areas subject to water exposure. This combination of finishes makes Modern Slate a superb choice when seeking a unified look for all areas of the home or commercial project.

Modern Slate is the perfect marriage of old-world charm and durability combined with modern design sensibility; providing a look and a product that will last a lifetime.
